

Smoke Outlook

Southern New Mexico Black Fire

6/03 - 6/04

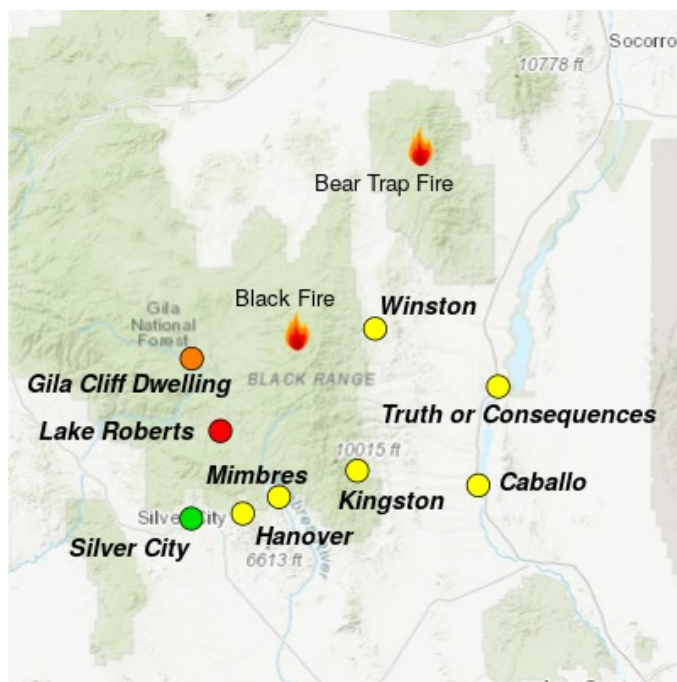

Issued by [Wildland Fire Air Quality Response Program](#) on June 03, 2022 at 07:00 AM MDT

Fire

The Black Fire is at approximately 264,657 acres with 29% containment.

Smoke

Winds in the area from the southwest increasing today with possible thunderstorms and adverse weather patterns east of the fire. This can create periods of weather that can cause erratic outflow winds in our outlook area. Winston and Chloride will continue to see moderate smoke in the area. Gila Cliff Dwellings area will continue to see unhealthy-USG smoke at periods due to light winds. Possibly clearing out in the late afternoon with southwest winds. Truth or Consequences and Caballo will have early good air quality switching to moderate and continued haze as southwest winds push smoke into the area. Haze will continue in the areas of Lake Roberts, Mimbres, Hanover, Kingston and San Lorenzo. They will have moderate air quality today with periods of smoke lingering until winds pick up in the afternoon out of the southwest. Possible periods of USG smoke when winds increase later today. Silver City will see good air quality today with SW winds. See below links for more information.
